

COMPANY PROFILE

Modern digital solutions for businesses that need more than just a website.

BUILD • TEST • AUTOMATE

Practical digital services spanning development, software quality and workflow automation.

Website Development

Web Applications

CMS & Admin Platforms

Software Testing / QA

Workflow Automation

What I Can Build for You

Website Development

- Landing pages and business websites
- Responsive and portfolio websites
- Conversion-oriented website experiences

CMS & Admin Platforms

- Database-backed websites and dashboards
- Content and media management
- Customer and admin workflows

Custom Web Applications

- Authentication and business dashboards
- Database-backed systems
- Custom workflows and API integrations

E-commerce

- Product catalogues and storefronts
- Cart / checkout-oriented architecture
- Product management and CMS integration

Software Testing & QA

- Manual, functional and regression testing
- Exploratory and responsive/UI testing
- Test-case creation and bug reporting

Workflow Automation

- Make and Activepieces workflows
- Lead, form and email automation
- API-connected business process automation

Built for real business needs. Every engagement is shaped around the required functionality, customer journey, operational workflow and level of ongoing control.
